PADS

Choosing the most appropriate pad or “chamois” to best suit your body type and kind of riding can make a huge difference to comfort and performance.

All our pads are supplied by industry leading Italian manufacturer Elastic Interface.

CYCLING PAD

Endurance 3D

- 3D anatomic shape achieved thanks to two half-moon components for enhanced fit.
- Special frontal top features an additional perforation to allow best air permeability.
- Perforated layer for enhanced air flow and ventilation throughout the whole chamois.
- Ultrahigh density inserts of 200kg/m^3 specifically shaped and designed to cushion main pressure points.
- EIT CARBONIUM FLASH material has special channelled structure for enhanced air flow and ventilation.
- 80 density 6 mm thick insert purposely located in the front area for improved flexibility.

NOTES

CYCLING PAD

Endurance 3D Women

- 3D anatomic shape achieved thanks to three components joined together for enhanced fit.
- Perforated layer for enhanced air flow and ventilation throughout the whole pad.
- Wide central area with extra density, specifically shaped to fit female anatomy.
- Ultrahigh density inserts of 120 kg/m³ specifically shaped and designed to cushion main pressure points.
- EIT CARBONIUM FLASH material has special channelled structure for enhanced air flow and ventilation.

NOTES _____

CYCLING PAD

Zoom X

- Elastic material from microfiber and polyester fibres for maximum breathability.
- Dual density construction guarantees a great degree of protection and comfort.
 - Bacteriostatic material.
- Extremely soft side wings providing freedom of movement and excellent fit.
- Perforated foam ensuring increased ventilation and quick dry.
- Specially designed perineal area to preserve blood circulation and to protect the sciatic nerve.
